SALE DAY.

land dries a little, so that plowing may be done.

There is a good supply of corn in the country, and the demand for bacon is less than in former years. Owing to the high price many persons will cut their bacon rations very short. In place of bacon they will fall back in a large measure on milk and butter. All those families who can realize the benefits of good pastures will make strenuous effort to procure milk cows, and thus adopt an inexpensive luxurious diet for the very costly plebelan bacon.

make better provision for a corn crop than heretofore.

The difficulty of getting food supplies on a credit, and the uncertainty as to the price which may be demanded for breadstuffs, together with the constantly declining price of cotton will have the effect of bringing the more wise and more provident planter to a position of comparative independence.

County claims were offered on the streets Sale Day, the highest price that we heard of being offered was at nine per cent. discount.

Stock in the Farmers' Bank seems to have been withdrawn from the market. We have seen none for sale for several weeks. The price has ranged from \$\stream{8}\$\text{sig}\$ up. The demand exceeds the supply, and from present indications the holders of single shares, as a rule, will soon be a thing of the past. will soon be a thing of the past.

The printing offices were well satisfied with their business on Sale Day. The collectionwere fairly good, but there are still some debtors whose arrearages would be quite ac-

LIFE AND ACTIVITY.

The Conservative Old Town of Abbo ville Taking on New Growth.

At no time in the history of Abbeville is there such demand for building lots, and at no time were there so many dwelling houses in the course of construction.

In obedience to the spirit of progress and the demands of the time Messrs. P. Rosen-In obedience to the spirit of progress and the demands of the time Messrs. P. Rosenberg & Co., have built and are still building cottages; Mr. J. C. Klugh has two dwellings in the course of construction; Mr. L. W. Parker is building three houses. Mr. B. K. Beacham has bought a lot from Mr. Parker and will build a home; the Land, Loan and Improvement Company are offering a whole section of land that has been laid off in beautiful lots in a desirable part of town; Hon. W. H. Parker, conservative and slow to act in booming matters, has also caught the spirit of trade and will sell from his real estate some of the finest lots for homes to be found in Abbeville. Already Rev. F. Y. Pressly, J. Hayne McDill and W. E. Bell have bought land from Mr. Parker, next adjoining Mr. Perrin, just across the street from Mr. Parker's own home. Mr. W. G. Chapman has bought a lot on Washington street, midway between the Rutledge house and the Oil Mill, and will build a house for rent.

The Allen Manufacturing Company are putting an immense shop which will employ anywhere from forty to one hundred hands.

The Iron and Brass Foundry is now going up, and the owners will employ from twenty to fifty skilled mechanics.

Mr. C. D. Brown having bought a lot from Mrs. Lythgoe. has given the contract for

to fifty skilled mechanics.

Mr. C. D. Brown having bought a lot from Mrs. Lythgoe, has given the contract for building his house to the Messrs. Allen.

Mrs. Barksdale has given a contract to Mr. Chapman to build a house in which she and Mrs. Jackson may live.

Mr. Thos. P. Quarlos will build a home next to the Associate Reformed church, and Mr. Jenner Link will also build in that neighborhood.

Jenner Link will also build in that neighborhood.

The Methodist parsonage is to be enlarged, raised to two stories, and otherwise beautified and enlarged.

The railroad shops will be built this summer, and some fitty additional houses will be required to shelter the families of the men who will work in them.

There seems to be a perfect craze for building houses, and we doubt not that other houses of which we know not, or have forgotten, will soon be built.

The land owners being willing to meet all demands on them for lots, the good work will go on for a time at least.

In connection with these notes, we would remark that we believe those who have surplus lands to sell, will find this a most favorable time, to find a buyer. A lot which is held, and upon which no return is made, is very much like refusing to collect a bond after the coupons have been cut off.

One of the most useful institutions in this village is the oil mill, which furnishes a good investment for money, and which supplies the cattle with the richest and best food at the lowest possible price.

the lowest possible price.

But the pride and crowning glory of our town is her fine churches; her superb school house and her unsurpassed educational facilities. No town in the State has better house and her unsurpassed concatonal acci-ties. No town in the State has better churches, and we are quite certain that we have an elegantly appointed school building as can be found in the State. While it is not as large as some structures, yet its architecture is modern, and its construction is of the best material. The money was judiclously ex-pended in its construction, and the total cost has run up to some \$14,000 or \$15,000.

surplus cash to put in a profitable investment will do well to consult the plat which we publish to-day.

This is no booming humbug gotten up to delude purchasers and make them invest in property which has no value, and is of no tangible consideration, but is a purely business venture undertaken by some of our most practical and prosperous citizens. There can be no question of the fact that Abbeville real estate is advancing in price and will continue to do so for some time to come. The names of the gentlemen who are interested in this property is a sufficient guarantee that it is no catch penny booming sale of worthless land, but is a good opportunity offered to those who wish to make profitable investments, and secure for themselves building lots in our beautiful, thrifty and healthy town.

Abbeville is now in the beginning of her material prosperity. She has shaken off her lethargy, and taken on new life. With churches which would be ornaments to more metropolitan and pretentions towns, with school facilities unsurpassed by any town in the State, with a refined and hospitable cutzenship, and with a bill of health which compares iavorably with any of her sister towns, there is every inducement for persons to locate among us, to increase our population, and to secure desirable homes in our town. This is indeed a tide in the affairs of some men which taken at the flood leads on to fortune, and they must take the current when it

THREE CHILDREN DEAD.

THE CORONER AT WORK

Published every Wednesday at \$2 Enquiring When, Where, and in What Manner the Children Came to Their Death.

Coroner J. Foster Hammond being notified of the death of three negro children, on the plantation of Dr. S. G. Thomson, eight miles South of Abbeville, organized a jury inquest and proceeded to take testimony as follows:

that Day-Few Sales—Quiet and Order Prevailed.

Last Monday was a beautiful day, and the rull number of representatives from the country districts honored the town with their presence.

There were no official sales, and, except a mortgagee's sale in the matter of foreclosure by Mrs. Christian Daniel in the sale of the land of Welch Adams no real estate was offered at public outery.

The usual number of old horses and mules were sold at auction. Very few good animals were sold from the stables. There seems to be a very limited demand for plow animals this year, and we heard but little enquiry for them.

The farmers, up to this time, have done almost no work on their farms, but they are ready to go to work with a will as soon as the land dries a little, so that plowing may be done.

There is a good supply of corn in the country and the demand for bacon is less than in

Lizzle X Logan.

Dave Webster, sworn, says:

When I came home on Wednesday evening they were gaily and playing. In short time after I came they all went to bed. After their mother came they all got up. Janie seems to be puny. They eat their supper and went to bed. Got home about an hour by sun. Got up and made up a fire about two o'clock. Her mother gave her some turpentine and some Samson snake root. Talked out of her head about half hour after she had taken medicine. Didn't put the turpentine and Samson snake root together. Had a spasm after she book the medicine. She foamed at the mouth after she had the spasm. She told the oldest child to taste it and see if it was strong enough. Janie was taken sick first, Lillie Elmore was taken sick next, Tilda Ann was taken last. Their mother told them to get up and get some chicken. Their mother made the tea for them. Saw the roots in the cup Lillie Elmore brought the root in her hand. Roots were about as large as a straw. Didn't know as there was any one about the house that day. Baby eat out of the same plate. Never eat anything more. Saw same medicine that was black calomel. Lizzle Logan said it was couch medicine. Didn't give them any medicine, but their mother had been giving them some horehound tea for cods. Gave them the tea some time before they were taken sick. Han't seen the bottle on medicine since the snow. Their mother gave them some horehound tea on Tuesday night. procure milk cows, and thus adopt as Inexpensive luxurious diet for the very costly pibelan bacon.

Estimates as to the amount of bacon sold in Abbeville this year as compared with preceding years place the amount sold this year up to the present time at one-fifth of the amount sold at the corresponding date last year. One firm made the actual additions, and found their sales this year to be only one-third of last year's sales at a corresponding date—or,4,000 pounds this year against 12,000 last year.

The sales of corn up to this time have been nominal. Tue demand is perhaps less than in any previous year.

The demand for guano is perhaps without a precedent, and in this fact, is indicated our danger. From all that we can learn our far mers intend to increase the crop to make up deficiency in the price of the staple.

While there are a great many larmers who seem anxious to give liberal liens, yet it is true that there is considerable inclination to reduce the credit purchases and return as near as possible to the good old plan of making the first process of the considerable inclination to reduce the credit purchases and return as near as possible to the good old plan of making the first process of the considerable inclination to reduce the credit purchases and return as near as possible to the good old plan of making the process of the considerable inclination to reduce the credit purchases and return as near as possible to the good old plan of making the process of the considerable inclination to reduce the credit purchases and return as near as possible to the good old plan of making the process of the considerable inclination to reduce the credit purchases and return as near as possible to the process of the considerable inclination to reduce the credit purchases and return as near as possible to the process of the considerable inclination to reduce the credit purchases and return as near as possible to the process of the considerable inclination to reduce the credit purchases the farm self-such and the pr

Eugene Parker, sworn, says:
Wasn't here Tuesday night. When I came Wednesday morning they were sick. Didn't know what was the matter with them. Janie Logan was sick when I came, Lillie was taken sick after I came, Tildy wasn't sick at that time as I know of. In the morning they was not suffering as I know of. On Wednesday Lizzie Logan told me to go after Jennie Wideman to sit up with her and be company. Lizzie seemed to be in trouble about her children. Lizzie Logan and myself went after Martha Morris and she came back with us. Left Dave Webster with the children about one o'clock that night when we went. Didn't know how long we were gone. CERTIFICATE OF PHYSICIANS.

F. E. Harrison, M. D., and W. A. Hunter, M. D., sworn, says:
This certifies that we have this day examined the bodies of Lily Elmore, Janie Logan and Tildy Logan, and find as follows:
The stomach, bowels, liver, and spleen show congestion more or less marked. The stomach is the seat of punctate hemorrhages, and of erosions especially near its orlices. The bodies of all them, present the same lesions. The facts of this autopsy indicate an irritant poison, and we recommend that an analysis of the contents of the stomach and bowels and of these organs be made.

For Railroad Shops and School Build

ing. The bonds which the town of Abbeville intends to issue for the railroad shops will soon be ready for the market. They will arrive in a short time, and persons who may wish to invest should file their claims with Mayor R. M. Hill. The contract with the railroad has not yet been finally and formally signed, and the bonds will not be sold until this is done, but as soon as the council and the railroad folk have finished the trade the bonds will be ready for delivery. ready for delivery.

The second issue of thirty \$100 bonds has been sold. Twenty-two of them go to Chester. Eight remain in Abbeville. They will be ready for delivery in a few days.

HARRIS' LITHIA WATER,

Harris' Lithia Springs, S. C.

J. T. Harris, Waterloo, S. C.:

Dear Sir—I find great benefit from the use of your Lithia Water. I consider it a fine tonic, and general regulator of the digestion, as well as very efficacious in those diseases for
which Lithia is considered somewhat of a specific.

JUDGE J. B. KERSHAW, Camden, S. C.

My wife has been using your Lithia Water and is very much benefited. I consider it in every respect equal to the famous Buffelo Lithia Water.

After a long and varied experience in the use of Mineral Waters from many sources, both foreign and domestic, I am fully persuaded that HARRIS' LITHIA WATER possesses efficacy in the treatment of afflictions of the Kidney and Biadder unequalled by any other water of which I have made trial.

This opinion is based upon observation of its effects on my patients for the past three years, during which time I have prescribed it freely and almost uniformly with benefit in the medicable maladies above mentioned.

When failure to relieve has occurred, I have imputed it to insufficient use of the Water, for my experience teaches me, that from one to two quarts daily should be taken from two to four weeks, to secure its full remedial effects.
